

**NAME :- P.MANOHAR**

**ROLL NO:-**

**122010333036**

## **EXPERIMENT -1**

**AIM:-** Control the LED with Arduino Board and tinkercad software.

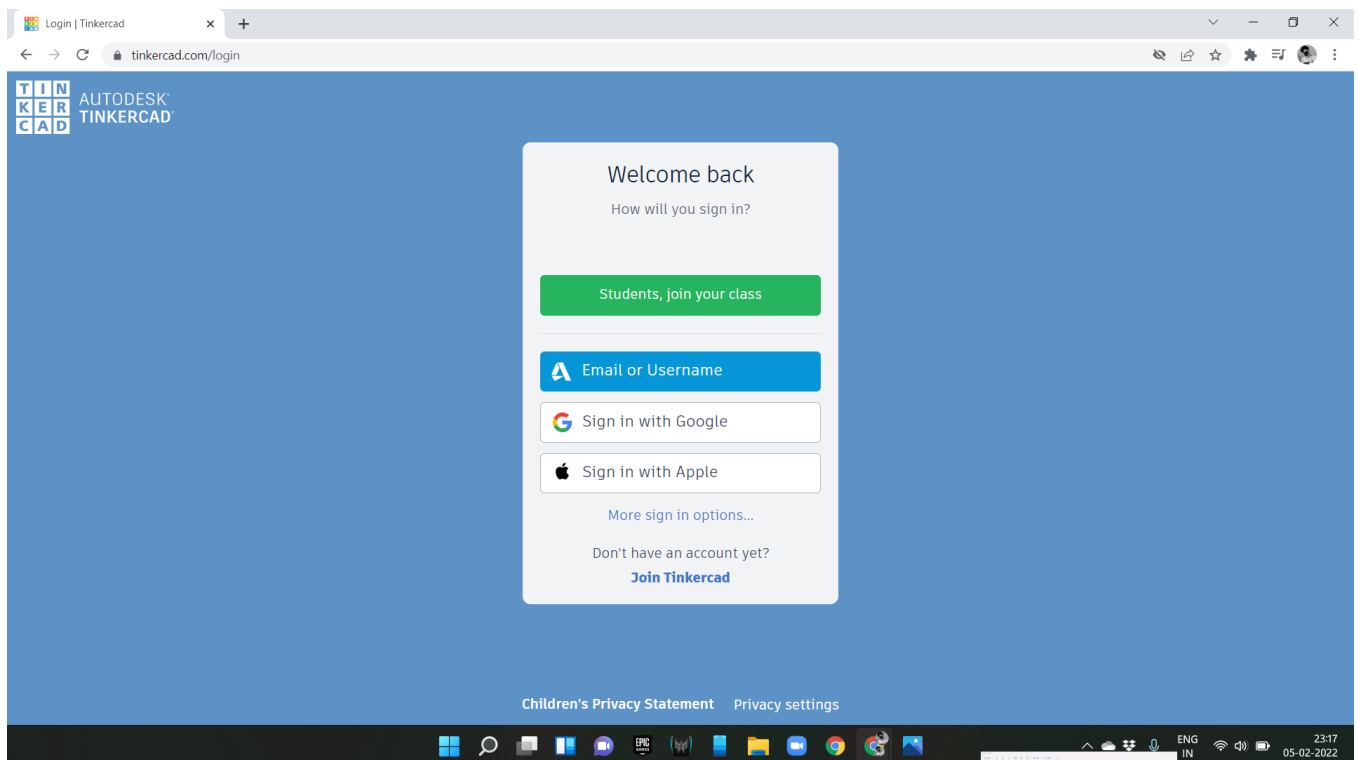

**OBJECTIVE:-** To get knowledge of Arduino board and control of output

device(LED). **OUTCOMES:-** Students will write program using Arduino IDE for Blinking LED. **HARDWARE REQUIREMENT:**

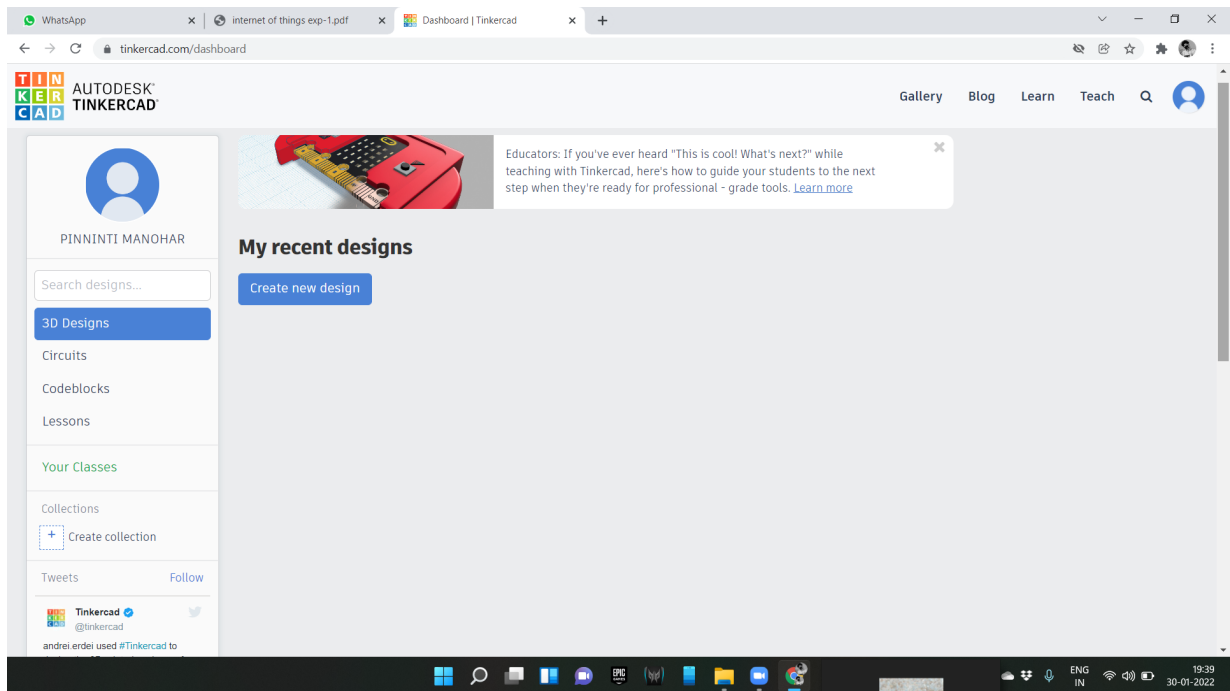

- 1)** One Breadboard
- 2)** One Arduino Uno
- 3)** One LED
- 4)** One 330Ω Resistor
- 5)** Two Jumper Wires

## **PROCEDURE:-**

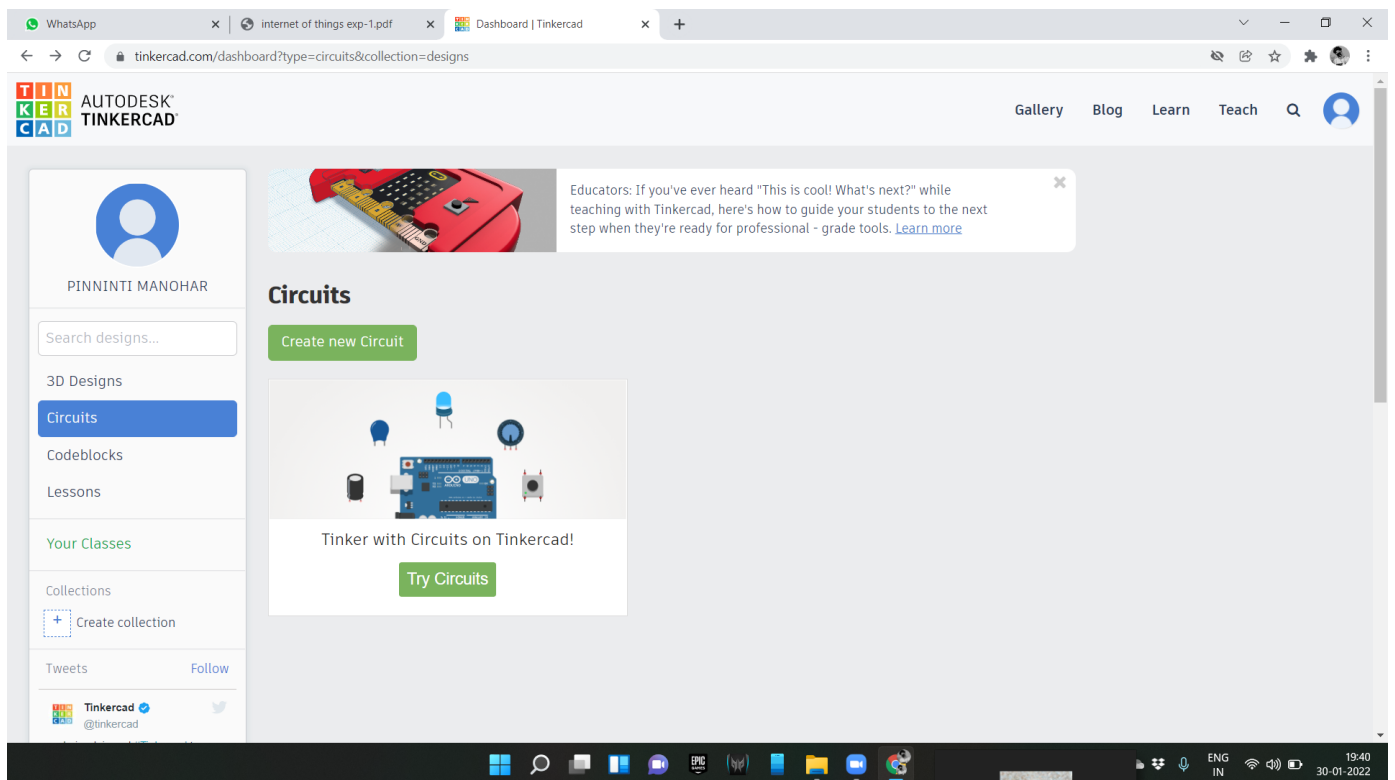

- 1.** Login with an existing gmail account or create a new account.

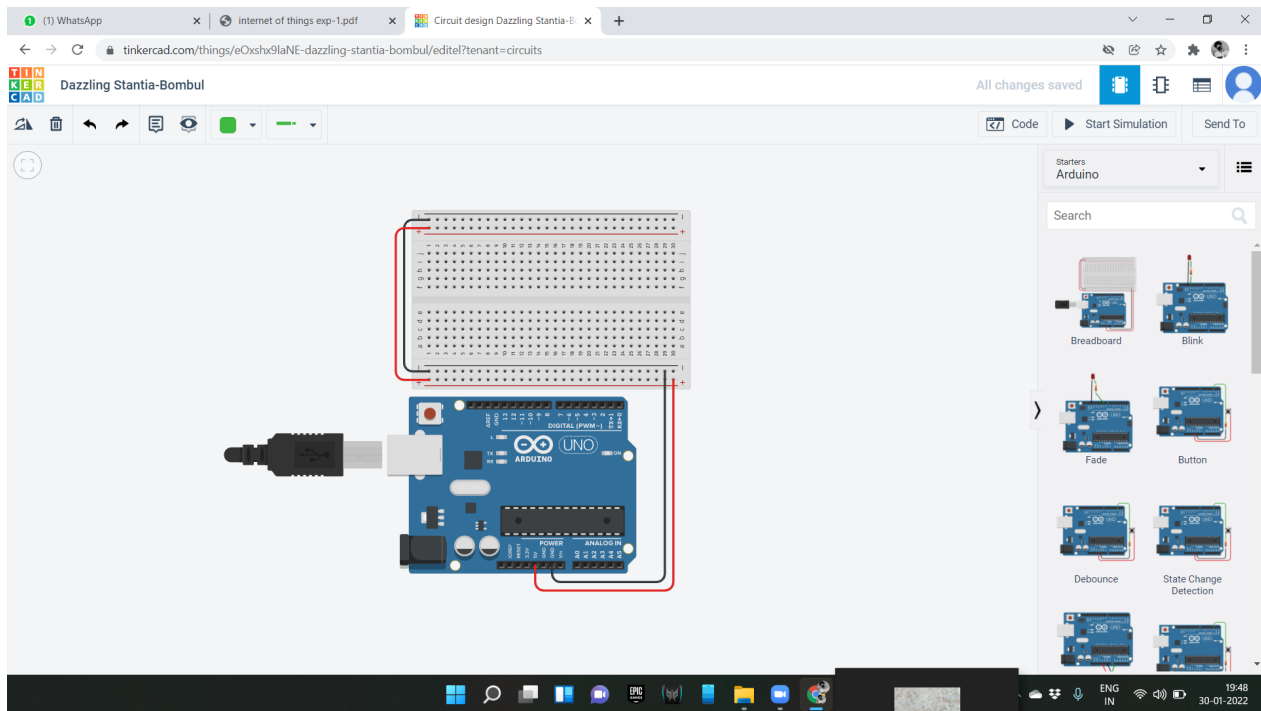

## 2. Click on create project and create a new project

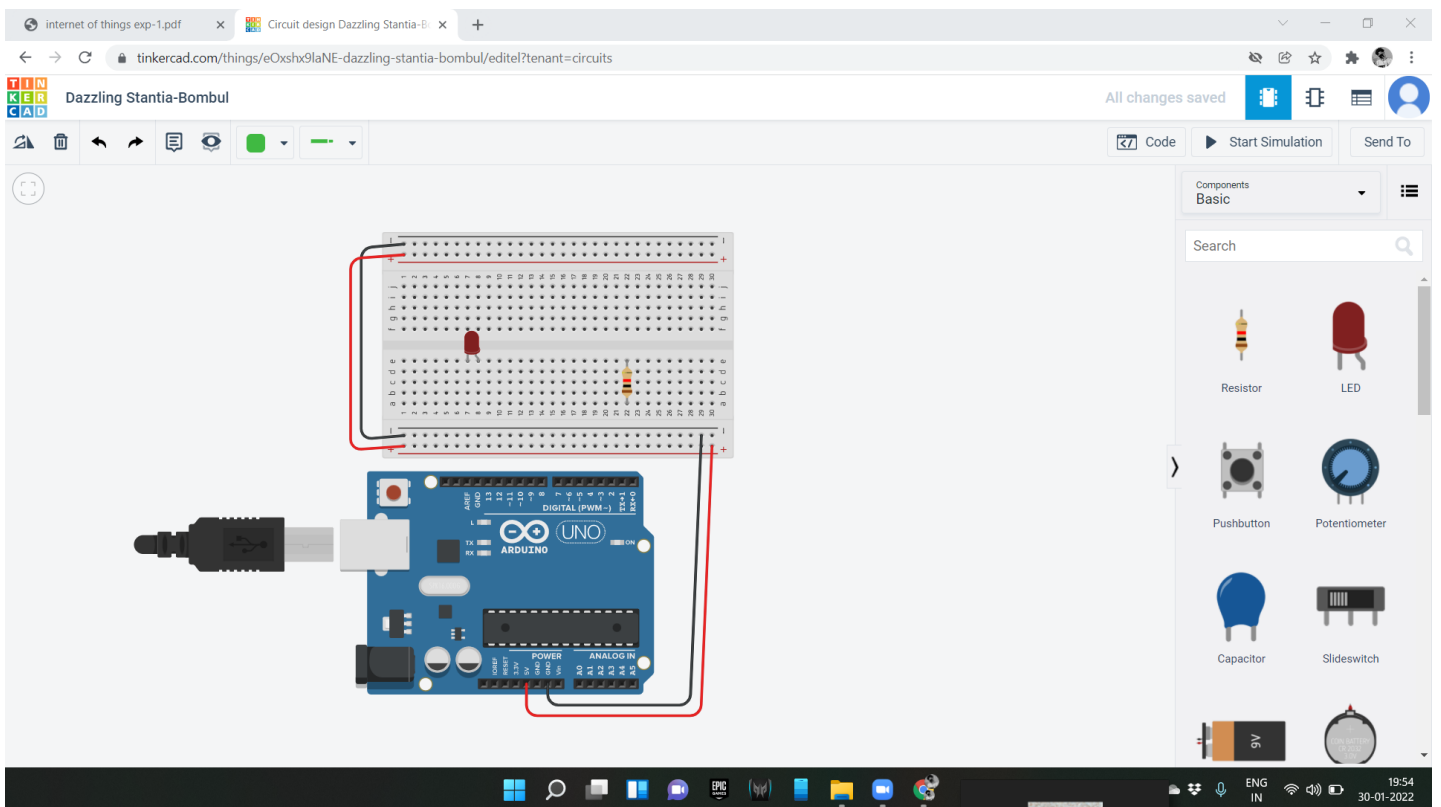

## 3. Go to Create menu and select circuit.

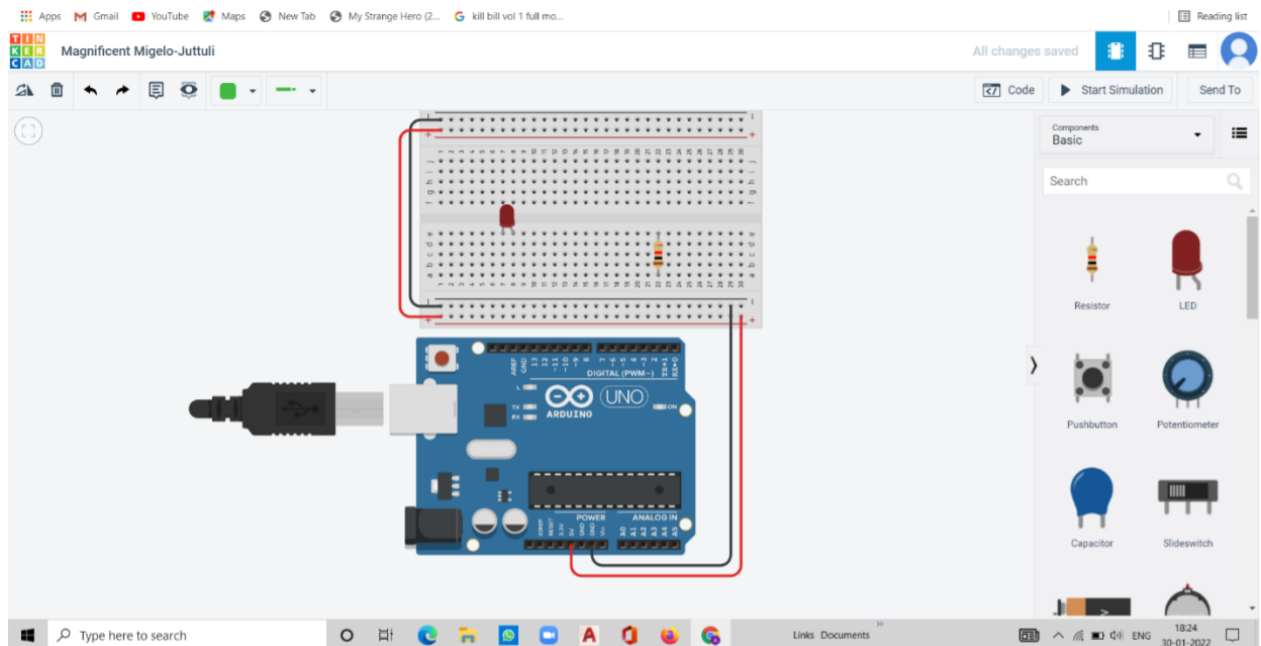

#### 4. Select the Arduino and breadboard and place it in the design area.

#### 5. Place Led and Resistor

- 6.** Search the component LED and resistor, make connections as shown and resistor value as 330ohms.

- 7.** Once circuit connections are ready , programming the Arduino can be done in 3 ways
- 1) Using code blocks**
  - 2) Using text program**
  - 3) Using code blocks + text programming**

Output Control Input Math Notation Variables

- set built-in LED to HIGH
- set pin 0 to HIGH
- set pin 3 to 0
- rotate servo on pin 0 to 0 degree
- play speaker on pin 0 with tone 60
- turn off speaker on pin 0
- print to serial monitor hello world with
- set RGB LED in pins 3 3 3

set built-in LED to HIGH

wait 1 secs

set built-in LED to LOW

wait 1 secs
